LEITZ SPECIFICATION

On the safe side with Leitz

For almost all Leitz measuring machines the respective accuracy values are true for a whole range of styli, with dimensions from $\varnothing 3 \times 35$ mm to $\varnothing 8 \times 130$ mm. With each Leitz CMM you are certain to invest in a high accuracy quality product.

Leitz styli

Specifications for Leitz CMMs are valid for all Leitz styli with

Dimensions from $\varnothing 3 \times 35$ mm to $\varnothing 8 \times 130$ mm.

Be informed, read the fine-print

When choosing the appropriate coordinate measuring machine (CMM) it is worth having a closer look at the measuring error stated given by the manufacturer.

There are great differences among the different makers. Important information is often hidden in the fine-print of the respective data sheets. Whereas Leitz specifies the accuracy for a full range of styli, there are others which publish the measuring error only for one stylus.
